

Diagnosing Herbicide Symptoms 2017

July 11-12, 2017 ■ UC Davis

Learn about herbicide symptoms and injuries, what can look like herbicide symptoms, field investigation process, and what herbicide symptomology tools are available

The Diagnosing Herbicide Symptoms 2017 course is an intensive **1.5-DAY course** focusing on how an herbicide injury situation can arise, what types of information can help diagnose herbicide problems during field investigations, and what tools are available to you. The course provides a rare opportunity for professionals to efficiently update their understanding of herbicide symptoms and injuries and interact with experts in this field.

WHO SHOULD ATTEND

The Diagnosing Herbicide Symptoms course is designed for pest control advisers, chemical company sales representatives, field investigators, and insurance adjusters.

TOPICS include:

herbicide mode of actions ■ how symptoms develop and progress ■ recovery from herbicide injury ■ relationship between symptomology and economical damage ■ herbicide symptomology tools ■ symptoms from several classes of amino acid synthesis inhibiting herbicides ■ symptoms from herbicides that mimic plant hormones and the synthesis of fatty acids ■ symptoms from herbicides that affect photosystem I, photosystem II, or that act by disrupting cell membranes ■ symptoms from several herbicide modes of action ■ field investigations ■ what happens when a UC Farm Advisor and/or the Agricultural Commissioner is called ■ biotic and abiotic symptoms that resemble herbicide symptoms

These topics are presented in lecture, field visit, and group activity formats. Each attendee will receive a comprehensive course notebook with lecture notes.

AGENDA

For an agenda, visit the **UC WEEDRIC WEBSITE** (<http://wric.ucdavis.edu>) and click on **Diagnosing Herbicide Symptoms course**.

DATES and TIMES

Day 1 :: July 11, 2017 :: 1:30 PM-4:40 PM (*check-in opens at 1:00 PM; social hour begins at 4:40*)

Day 2 :: July 12, 2017 :: 8:00 AM-4:25 PM
