

AQUATIC WEEDS Herbicide Susceptibility Table

Herbicides commonly used to control aquatic weeds. An “x” indicates that a particular weed is susceptible to the herbicide. This information was compiled from a number of sources including (but not limited to), US Army Corps of Engineers Technical Report A-88-9, 1988 and the Indiana Commercial Pesticide Applicator Training Manual, 1997. This information may change. Consult the herbicide label for the most current list of susceptible plants and use restrictions. Read and follow label directions. Inclusion in this table is for informational purposes only and does not constitute a recommendation or warranty.
